PROFESSIONAL EXPERIENCE

- **Orange Wholesale** Rennes, France
Software Engineer - Apprenticeship April 2023 – Present
 - **End-of-Study Project (ongoing, 6 months):** Led modernization of legacy PHP/Apache services to stateless Kubernetes-based cloud in Golang, collaborating cross-functionally to integrate OpenTelemetry, GitLab CI/CD pipelines, and reusable packages.
 - **AI Code Review:** Designed automated code review system in Python, tailored with prompt engineering to pre-analyze pull requests and reduce review load.
 - **Evita:** Coordinated supervision scenarios across stakeholders for call center with simulated VoIP, SMS alerting, and silent anomaly detection across 6 client journeys.
 - **TracerouteGraph:** Grafana plugins with React and D3.js to visualize traceroute network metrics, now actively used in monitoring, with a clear improvement in network observability.
 - **Cockpit:** Mentored code reviews and improved alerting microservices in Golang by optimizing backends and strengthening automated Docker-based tests. Shared best practices with team.
- **Orange Innov** Bucharest, Romania
Devops Engineer - Internship June 2025 – September 2025
 - **Cloud Console:** Refined Java Spring Boot app for managing multi-cloud projects with budget-rights controls. Gathered and implemented user feedback from stakeholders.
 - **Mailing Service:** Led design and deployment of Java Spring Boot mailing service with GitLab CI/CD pipeline and automated deployment on Google Cloud Run.
- **Orange Wholesale** Rennes, France
Full-Stack Developer - Internship April 2023 – July 2023
 - **Team247:** Gathered user requirements and delivered PHP/JavaScript web app for validating on-call schedules to improve calendar management. Collected feedback for iterative improvement.
 - **RTB3:** Designed and owned modular test libraries with Robot Framework and Shell scripting to automate SIM card control. Documented processes for team reuse.
- **Districenter** Saint-Aubin-du-Cormier, France
Student Warehouse Worker Summers 2019 – 2021
 - Rehired every summer for reliability and immediate autonomy in a fast-paced warehouse environment.

EDUCATION

- **IMT Atlantique** Nantes, France
Engineer's degree (Apprenticeship) - Software Development - GPA: 3.84 September 2023 – September 2026
 - **Airport IoT System:** Collaborated on distributed system to simulate and monitor airport sensors via MQTT and ESP32 with Golang services and a React dashboard.
 - **Pascal.es:** People's Choice Award for designing a peer-support app against alcoholism with Figma (Hacking Health Nantes / Nantes Design School).
- **IUT of Nantes** Nantes, France
Bachelor's degree in Computer Science September 2021 – September 2023
 - **Pixel Runner:** Developed networked multiplayer logic in Golang for a 2D speed game.
 - **Fruits:** E-commerce sites in PHP and Vue.js with cart and online payment management.
 - **Martian Chess:** Kotlin strategy game with advanced design pattern implementation.

SKILLS

Development: Go, Java, TypeScript/JavaScript (React), SQL, PHP, Kotlin, Python
Frameworks/Tools: Git, Docker, Kubernetes, GitLab CI/CD, Nix, Ansible
Data & Observability: OpenTelemetry stack, Grafana, Opensearch, InfluxDB
Methodologies: Agile, Design Patterns, Agentic AI, SpecDriven Development

LANGUAGES & INTERESTS

Languages: French (Native), English (TOEIC 950/C1), German (Basic)
Volunteer: Multiple Sclerosis Association
Interests: Cooking, climbing, self-hosting/electronics, running, motorcycling
